

2022 VSCRC Round 1 Sandown Competitor, Crew, Media and Contractors Circuit Access.

Friday Saturday and Sunday access

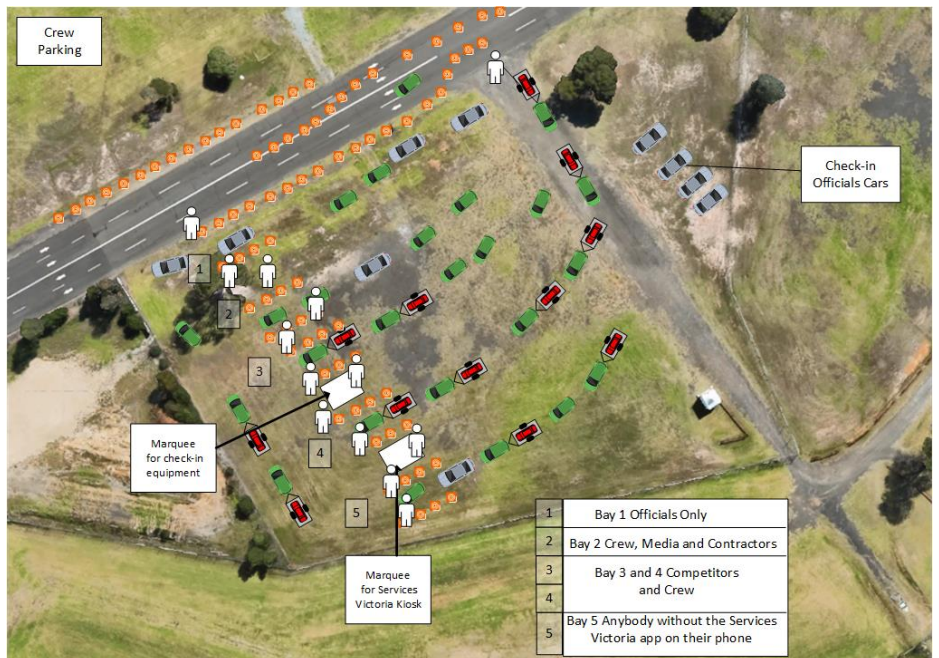

Under government regulations, to participate in this event you will be required to have up to date vaccination or produce a government exemption certificate. Noncompliance of this requirement will mean no access to the paddock or circuit proper.

Access to the Sandown property for the first round of the 2022 VSCRC event will be via the overpass across Princess Highway for Dandenong bound traffic or from the in ramp from Princess Highway for City bound traffic.

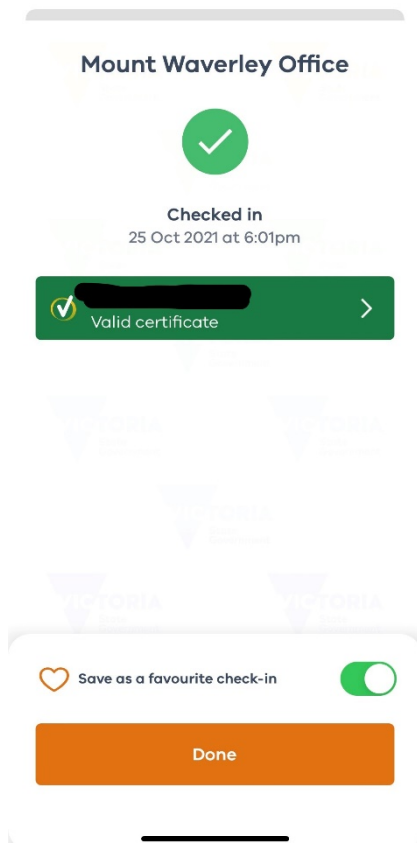

As we will be expecting COVID related traffic to be entering the property MRC

(Sandown) will provide a luminated sign which will be placed at the junction of the in ramp and the overpass, directing COVID traffic to the right and down to an area past the end of the Grandstand. The road will also be divided using bollards to provide lanes for traffic to follow.

Traffic arriving for the Race Meeting will be directed to the grassed area on the left just past the check point where we will have 4 bays set up to speedily process our customers as they arrive. As you access this Red Hill area a

concierge will direct you to a bay and check to see if you have access to the Services Victoria App on your phone. If you have the app, you will be directed to one of the scan bays where you will be required to scan the Services Victoria QR code. This will give a tick for COVID sign in and if you have the vaccination certificate set up in this app a tick for that. If you do not have the Vaccination certificate linked to the Services Victoria app you will need to provide a printed copy of the certificate or digital copy on your phone. Once the proof of vaccination has been viewed by the check point staff you will be issued a wrist band and be directed to park in grassed area directly opposite Red Hill along Racecourse Drive. **Competitors or cars with trailers will be issued with a team car pass** to enable you to get into the paddock area to unload.

Once set up competitors will proceed to garage 34 to have their documentation validated and be issued with a different coloured wrist band which will allow competition access for the weekend. The Red Hill scan process will be completed each day and you will be issued with a **different colour wrist band** to get through the security gate each day.

If you do not have a smart phone or cannot access the Services Victoria app on your phone, please tell the concierge as you turn into the Red Hill grassed area and you will be directed to the other side of Red Hill to a kiosk set up which will be used to register you for COVID checking. At this point you will also need to provide proof that you are double vaccinated or an exemption certificate for the vaccination. Once cleared by the operator you will be given a wrist band and directed where to park.

Please note if you leave the paddock area you may be requested to scan in again but please once you have been issued a wrist band for the day do not take it off until you are sure you are not returning to the paddock area.

When entering the circuit precinct and moving along Racecourse Drive or leaving the area at any time over the weekend. Please remember that there will be COVID testing and vaccination happening in the area and there could be much more traffic than normal so please observe all speed limits and drive with caution.
